

Rosemount Tank Radar AB Environmental Policy

Rosemount Tank Radar AB delivers products which protect the environment by preventing overfill and pollution aboard tankers and in plants within the oil and chemical industries.

In addition to product design for high safety and reliability, the internal work processes for development, manufacturing, and recycling shall be continuously improved with an intention to prevent pollution.

Our environmental objectives aim to:

- design products for minimal environmental impact throughout the life-cycle
- replace materials which cause environmental impact in our processes and installations
- minimize consumption of raw materials
- prevent unnecessary waste products and minimize their environmental impacts
- minimize environmental impact from emissions during transportation
- minimize energy consumption

Legal and other requirements including company group requirements, applicable to environmental aspects, must be followed.

The company shall freely inform about environmental matters.

In order to be aware of the company environmental objectives, all employees are to be educated in environmental work so as to be motivated to consider recycling, continuous improvements and preservation of natural resources.

Robert T. Sharp
